FERTILL

WHY LOCALISE ?

The fertilizing elements are placed close to the active zone (from the microbiological point of view), allowing the roots to reach them. Fertilisation is thus more effective.

- It reduces or even eliminates the risk of ammonia volatilisation.
- It reduces the risk of losses by runoff and erosion.
- It reduces the emanation of odours.
- It breaks the preferential flow channels (retreat slots).
- Avoid burning vegetation

1 UNIT 4 POSSIBILITIES

The frame as well as the inter-rows are modular.

In order to adapt to the different widths and inter-rows of precision planters, we have studied 4 fertilisation configurations, which can be upgraded.

- **simple** unit
1 inter-row
on 2

- **twin** unit
1 inter-row
on 2

- **simple** unit

inter-row

THE UNIT

This disc injector mounted on a parallelogram damped on air unit is guided by an oscillating arm. This allows to work at high speeds even in the presence of residue. Single or twin row elements make it possible to adapt perfectly to each spacing.

Simple row unit

Twin row unit

FERTILISATION KITS

■ Regulation LiquidXConnect

- 2 models, 15 or 75 l/mn (combinable)
- Fittings, couplings, direct battery socket, high/low position sensor
- GPS and on/off switch
- Software for Android
- 1 pump: tablet 8", with cabin mount bracket and a carrying bag
- 2 pumps: tablet 10", with cabin mount bracket, a carrying bag and an electronic connexion case

Tablet with app fertilization management

■ Tank

Available capacity 700, 1100 (rinse tank 125l), 1200 (rinse tank 135l), 1500 (rinse tank 150l), 1850 two product (750+1050l, rinse tank 125l), 2200L (rinse tank 250l)
Delivered with hand-washing tank, homologated NF EN ISO 4254-6

■ Liquid fertilisation kit

Wilger ball flow indicators
Included in the kit:

- filter
- pressure gauge
- manifold
- one set of nozzle
- 8m hose for connexion
- additional connector hose under the tractor

■ Solid fertilisation kit

- manifold Ø 100
- 1 hose per unit
- air release
- assembly on Fertill

FRAME

Mounted, telescopic, foldable, trailed

From 3 to 12m, (3m on road)
& stand for liquid tank
